SharpForm IT Integration, Inc.

Dear Hiring Committee,

I am excited to apply for the Computer Help Desk Representative role at SharpForm IT Integration, Inc. As a Computer Science student at the University of Oregon with hands-on experience troubleshooting hardware and software issues, I am eager to bring both my technical knowledge and my strong communication skills to support your clients effectively.

In my IT and academic experiences, I have resolved technical issues across Windows and macOS systems, configured user accounts, and assisted peers and community members with hardware, software, and connectivity problems. I am comfortable walking non-technical users through troubleshooting steps with patience and clarity, whether in person or over the phone, which I gained much experience from my help desk job at Pacific University. I also understand the importance of documenting issues and solutions thoroughly, ensuring smooth handoffs and consistent service.

What excites me about SharpForm IT Integration is your emphasis on flexibility and valuing team members' unique talents. I thrive in environments where I can solve problems collaboratively while continuously learning. I bring a strong work ethic, a dedication to clear communication, and a proactive mindset to every project. I am confident I can deliver excellent support that not only resolves immediate issues but also helps clients feel confident in using their technology.

I would welcome the opportunity to contribute my skills to your team and to grow as a help desk professional at SharpForm IT Integration. Thank you for considering my application.

Sincerely,

Kenny Nguyen
