Deloitte

Dear Hiring Committee,

I'm excited to apply for the Cyber Summer Scholar internship at Deloitte. As a computer science student with a strong interest in cybersecurity and AI, I'm eager to join a team that's shaping the future of digital resilience. What drew me most to this position is Deloitte's focus on going beyond growth and unlocking "exponential possibilities." That mindset aligns with how I approach learning and problem-solving, which is always looking for ways to dig deeper, push limits, and create something that lasts.

In my coursework and projects, I've built a foundation in computer science and gained hands-on experience in programming with Python, C++, and C. I've also been learning about systems, algorithms, and security principles, which sparked my interest in how vulnerabilities are identified and addressed. Outside of class, I've worked on coding projects that challenged me to think critically about efficiency and structure, skills I know directly translate to analyzing networks and designing secure systems. I may not be an expert yet, but I'm motivated to learn fast, ask good questions, and contribute wherever I can.

What excites me about Deloitte specifically is the opportunity to work with mentors and peers on real-world challenges like threat detection, incident response, and regulatory risk management. I value collaboration and know that cybersecurity is never a solo effort. The chance to grow alongside a team that balances technical excellence with strategic insight is exactly the kind of environment where I know I'd thrive.

I'd be grateful for the opportunity to bring my drive, curiosity, and developing technical skills to Deloitte's Cyber Summer Scholar program. Thank you for considering my application, and I look forward to the possibility of contributing to Deloitte's mission of making an impact that matters.

Sincerely,

Kenny Nguyen
