Lane Education Service District

Dear Hiring Committee,

I am excited to apply for the Desktop Support Technician position at Lane Education Service District. As a Computer Science student at the University of Oregon with hands-on experience troubleshooting hardware and software issues, setting up systems, and supporting users, I am eager to bring my technical skills and customer-focused approach to Lane ESD's Technology Services team.

In my academic projects and IT support experiences, I have configured and maintained Windows and macOS systems, set up user accounts, and resolved both hardware and software issues for classmates, staff, and community members. I am comfortable breaking down technical problems into clear, actionable steps for non-technical users, and I take pride in ensuring that end users feel supported and confident. My coursework and personal projects have also built my foundation in networking, system security, and inventory management, which align closely with this role's responsibilities.

What draws me to Lane ESD is its commitment to equity, collaboration, and removing obstacles from instruction. I believe technology is most powerful when it empowers learners and educators, and I want to contribute to making that possible. As someone who values clear communication, patience, and integrity, I am excited about the opportunity to support teachers, staff, and families across Lane County.

I am enthusiastic about joining Lane ESD's mission of supporting excellence in education and would welcome the opportunity to discuss how my skills and dedication can contribute to your team. Thank you for considering my application.

Sincerely,

Kenny Nguyen
