School of Computer & Data Sciences, University of Oregon

Dear Hiring Committee,

I am excited to apply for the Executive Assistant position with the School of Computer & Data Sciences at the University of Oregon. As a Computer Science student graduating March 21, 2026, I bring a unique combination of administrative experience, understanding of the CS and Data Sciences field, and a deep commitment to supporting the mission of SCDS.

My administrative and clerical experience has prepared me well for this role. As a Member Service Representative at NW Priority Credit Union, I processed financial transactions, maintained detailed records, and handled sensitive information with accuracy and confidentiality. I communicated effectively with members, provided information on services and policies, and managed multiple tasks in a fast-paced environment. This experience developed my organizational skills, attention to detail, and ability to handle confidential material professionally.

My experience at Pacific University as a Computer Helpdesk Technician provided valuable higher education administrative experience. I supported university faculty and students, managed daily system performance, and coordinated equipment setup and installations. I developed strong communication skills working with diverse university stakeholders and learned to navigate university procedures and policies. This role taught me to work independently, troubleshoot problems, and maintain organized records of work performed.

In my current role as a Software Engineer Intern at EpiBuild, I have gained extensive experience with data management, information organization, and project coordination. I manage complex data processing workflows, maintain detailed documentation, and coordinate with team members to ensure accurate information flow. I have experience handling sensitive data while maintaining compliance requirements, demonstrating my ability to exercise sound judgment with confidential material.

What makes me particularly well-suited for this position is my understanding of the Computer Science and Data Sciences field as a current student. I am familiar with the research areas, academic programs, and the unique needs of faculty and students in SCDS. This knowledge will enable me to better support SCDS leadership in advancing strategic initiatives and

communicating effectively with faculty, staff, and university partners.

I am proficient with Microsoft Office applications including Word, Excel, PowerPoint, and Outlook, and I have experience with various scheduling and calendar management tools. My technical background also allows me to quickly learn new systems and software that may be used in the role. I am fluent in Vietnamese, which enhances my ability to communicate with diverse backgrounds and cultures.

I am drawn to this position because it offers the opportunity to contribute to SCDS's mission of solving next-generation computational and data-driven challenges while supporting the administrative needs that enable faculty and students to excel. The part-time schedule aligns well with my graduation timeline, and I am excited about the possibility of transitioning from student to staff member at the University of Oregon.

Thank you for considering my application. I look forward to the opportunity to contribute to the School of Computer & Data Sciences and support the important work of advancing computational and data science education and research.

Sincerely,

Kenny Nguyen
