Sumner College

Dear Hiring Committee,

I am excited to apply for the IT Administrator position at Sumner College. As a computer science student with hands-on experience in hardware troubleshooting, networking basics, and system support, I am eager to contribute to maintaining a reliable and secure technology environment for faculty, staff, and students.

In my academic and personal projects, I have worked with technologies such as Windows, Office 365, and Linux environments, and I have experience troubleshooting computer hardware, configuring software, and assisting with network connectivity issues. For example, I recently built and upgraded my own PC, resolving compatibility and driver issues, which gave me strong problem-solving skills applicable to supporting campus hardware and software systems. Additionally, my coursework in programming (Python, C, and C++) has trained me to approach technical challenges methodically, while my experience using collaborative tools such as Git and cloud platforms has strengthened my adaptability.

What excites me most about this opportunity is the chance to work in a student-centered educational environment. I enjoy helping others solve their technology challenges, whether it's restoring access to accounts, setting up new devices, or troubleshooting connectivity issues. I am motivated by the fast-paced nature of IT support and look forward to providing timely, respectful, and effective assistance to Sumner College's faculty, staff, and students.

I would be grateful for the opportunity to bring my technical knowledge, problem-solving ability, and enthusiasm for IT to Sumner College as an IT Administrator. Thank you for considering my application. I look forward to the possibility of contributing to your team and supporting the college's mission.

Sincerely,

Kenny Nguyen
