Boeing

Dear Hiring Committee,

I am excited to apply for the Intern to Entry Level Conversion - Engineering position for the Summer 2025 Intern Program at Boeing. As a computer science student at the University of Oregon graduating March 21, 2026, I am eager to contribute to Boeing's mission of shaping aerospace innovations and inspiring the next century of explorers.

My current experience as a Software Engineer Intern at EpiBuild has provided hands-on exposure to full-stack development, automated data processing, and engineering solutions. I've developed intelligent systems using algorithms like Levenshtein's distance for data matching, created web applications that process and visualize critical information, and automated workflows using Google Apps Script. These experiences demonstrate my ability to work on projects requiring precision, problem-solving, and attention to detail, qualities essential in aerospace engineering.

My technical skills align well with Boeing's engineering needs, particularly in Software Engineering and Systems Engineering. I have experience with full-stack development using JavaScript, Python, and various frameworks, as well as building and training machine learning models. My projects, including EmoScanner and Four's & Nine's, showcase my ability to work with data processing, algorithm optimization, and system design, skills that translate directly to engineering challenges in aerospace systems.

What excites me most about this opportunity is the chance to apply my software engineering skills to projects in space systems, military systems, commercial aircraft, or technology development. I am particularly interested in contributing to systems that ensure safety, reliability, and innovation, values that Boeing embodies. The hybrid work arrangement in Portland, OR aligns perfectly with my location, and I am eager to collaborate with experienced engineers while learning about aerospace engineering principles.

I am drawn to Boeing's commitment to connecting the globe, protecting freedom, and advancing scientific discovery. The opportunity to work on engineering projects with real-world impact represents exactly the kind of meaningful work I am passionate about pursuing. I am confident

that my technical foundation, collaborative mindset, and enthusiasm for engineering will allow me to contribute meaningfully to your team.

Thank you for considering my application. I look forward to the possibility of joining Boeing as an engineering intern and contributing to the innovative solutions that define the future of aerospace.

Sincerely,

Kenny Nguyen
