Emerald Media Group, Inc.

Dear Hiring Committee,

I am excited to apply for the Student Web Developer position with Emerald Media Group. As a Computer Science major at the University of Oregon with experience in HTML, CSS, JavaScript, and WordPress, I enjoy using my technical skills to solve problems and make websites easier to use and manage.

In my IT and web development work, I've helped troubleshoot hardware/software issues, maintain websites, and ensure systems run smoothly for users. I also bring experience from class projects and internships where I implemented both design and functionality updates to improve usability. I'm comfortable working with WordPress, making updates on the fly, and tracking down bugs until they're solved. I like that this position offers the opportunity to collaborate with editors and staff to improve site performance and keep content accessible for the community.

What excites me most about this role is being able to apply my technical skills in a real-world publishing environment. I value the chance to learn from the media side while contributing my strengths in problem-solving, attention to detail, and adaptability to your digital team.

Thank you for considering my application. I would be glad to support Emerald Media Group by maintaining and improving your site while gaining more hands-on experience as a student developer.

Sincerely,

Kenny Nguyen
