Onco360 Pharmacy

Dear Hiring Committee,

I am excited to apply for the Website Developer position with Onco360 Pharmacy. As a Computer Science student graduating March 21, 2026 from the University of Oregon, I bring strong web development skills, healthcare technology experience, and a passion for building high-quality websites that make a meaningful impact.

My web development experience aligns well with this position. I have extensive experience building full-stack web applications using HTML, CSS, and JavaScript, creating responsive and interactive user interfaces. I have developed web applications that process and visualize data using modern JavaScript libraries including D3.js, Chart.js, and Leaflet, demonstrating my ability to create engaging and functional web experiences. My projects showcase my ability to build user-friendly websites from concept to completion, ensuring optimal user experience across various devices.

My healthcare technology experience positions me well for this role. As a Software Engineer Intern at EpiBuild, I work extensively with healthcare and pharmacy-related systems, processing clinical data and building applications that support patient care. This experience has given me understanding of healthcare technology environments, patient data management, and the importance of creating reliable digital solutions in healthcare settings. My work with clinical data systems provides relevant context for developing websites that serve patients and healthcare professionals.

My technical skills match the requirements of this position. I am proficient in HTML, CSS, and JavaScript, and I have experience with full-stack development that includes both front-end and back-end technologies. I have worked with Python for back-end development and data processing, and I am eager to expand my skills to include PHP and content management systems. My experience with Git for version control and collaborative development demonstrates my ability to work effectively in cross-functional teams.

What excites me most about this opportunity is the chance to contribute to Onco360's mission of helping patients access life-saving medications. The opportunity to build and maintain websites

for Onco360 Oncology Pharmacy, CareMed Specialty Pharmacy, and ConnectMed360 represents exactly the kind of meaningful work I am passionate about pursuing. I am particularly drawn to the collaborative nature of this role, working with designers, content creators, and marketing teams to create digital experiences that support patient care.

While I am still developing toward the preferred 2+ years of professional experience, I bring strong foundational skills, a proven ability to learn quickly, and relevant healthcare technology experience. I am committed to continuous learning and staying current with web development trends and technologies. I am eager to contribute to Onco360's web presence while growing as a website developer in a supportive and purpose-driven environment.

Thank you for considering my application. I look forward to the opportunity to contribute to Onco360 Pharmacy and help build websites that better the lives of those battling cancer.

Sincerely,

Kenny Nguyen
